

Portable hand wash unit providing electrically heated water

The Teal HMX230 Handeman Xtra 230V

The most portable hand wash unit - ever!

Fill with water and carry to wherever it's needed.

Just plug into any nearby mains power supply – it's perfect for any situation where a hot water hand wash is a requirement and there is no plumbing or water supply available.

The electrical cable is 3 metres long.

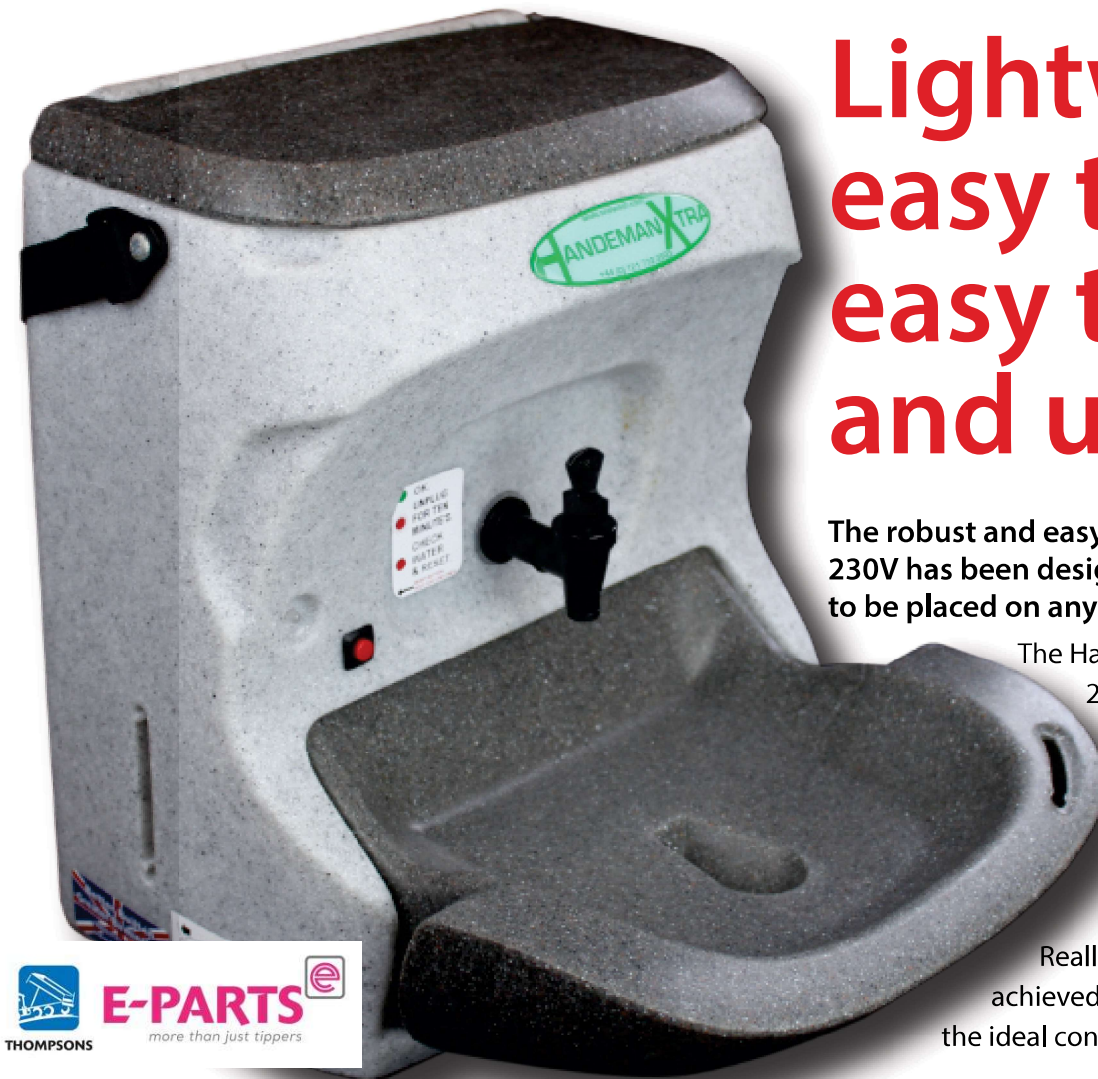

The most portable hot water wash unit ever - ensuring that you can wash your hands wherever there's a mains electricity socket!

**Lightweight,
easy to carry,
easy to clean
and use!**

The robust and easy to clean Handeman Xtra 230V has been designed for wall mounting or to be placed on any firm, flat, level surface.

The Handeman Xtra for use with a 240V electricity supply is perfect for any situation where a hot water hand wash is a requirement and there is no convenient water supply available.

Really effective hand hygiene is achieved under hot running water at the ideal constant temperature of 38-40°C.

The Handeman Xtra for mains supply provides a minimum of fifteen 12 second hand washes per filling – enough for hard day's work. It's fitted with a carrying strap and four screw fixings for wall mounting and has a 3 metre long cable.

No plumbing is required.

Paper hand towel holders and soap bottles and bracket are available as extras.
