The robust brick stack grapple KM 331 handles loads up to 2000 kg.

- Fixed plunge depth with pivot clamping arms hydraulically operated.
- **Versatile tool** with opening range of 40 mm to 1500 mm i.e. for handling of single concrete products like curbstones, or handling of palletized brick packs.
- Synchronised function of clamping arms due to sturdy gear-toothed quadrants.
- Safety through internal pressure relief valve (independent from crane pressure) and non-return valve (safe clamping force at pressure drop).
- Reduced overall height in comparison to the plunge depth due to lower rotator position.
- **Compression rails** with durable and replaceable rubber inserts.
